Davi Ponce Manieri

Software Engineer | Android, Full-stack & Applied AI

Brazil | Interested in international remote opportunities

dvponce3@gmail.com | Portfolio | GitHub | LinkedIn

Software developer specializing in native Android, with experience building web applications, backend services and production AI integrations. Works across architecture, device integration, testing and automated delivery.

EXPERIENCE

Tecnomotor Eletrônica | 2025 - present

Android Software Developer (official title: Programador III)

- Develop and maintain automotive diagnostic and measurement applications with Kotlin, Jetpack Compose and XML; contribute to architecture and modularization.
- Integrate apps with devices and firmware, implement real-time charts, and handle communication failures, reconnections and timeouts.
- Work on HTML/PDF reports, REST APIs, Firebase, communication security and GitLab CI/CD build automation.

Tecnomotor Distribuidora | 2024 - 2025

Automation Developer

- Built tools and scripts for internal business processes, translating operational problems into automation solutions.

BACKEND & APPLIED AI

Built a microservice integrating the OpenAI API, deployed to Google Cloud Run with automated CI/CD. Experience with Python and Flask; RAG and LLM/agent architectures are areas of study and experimentation.

SELECTED PROJECTS

Clareza - Built a personal finance web app from scratch with Next.js, React, TypeScript and Firebase: financial rules, CSV imports, user data isolation, automated tests and CI/CD.

Lectio Divina - Built an Android liturgy and reflection app using Kotlin, Compose, MVVM/StateFlow, Room, Retrofit and WorkManager.

Operations ERP - Contributed to a full-stack inventory team project and coordinated three contributors new to programming.

SKILLS

Android: Kotlin, Compose, Coroutines/Flow, Room, Retrofit. Web: React, Next.js, TypeScript, REST APIs, Firebase. Backend & delivery: Python, Flask, Docker, Cloud Run, Git, CI/CD. AI-assisted development with code review and validation.

EDUCATION & LANGUAGES

Computer Engineering - UNIVESP | Degree in progress

Technical Diploma in Systems Development - SENAI | Completed; recognized for academic performance

English - B1 (intermediate), currently studying at inFlux
